Athens ISD uses The TEKS Resource System (TRS) as our curriculum. TEKS Resource System is a guaranteed & viable curriculum. Content area experts ensure quality through a process of continual review.

The key components of the TEKS Resource System curriculum are:
1. A K-12 systemic model in the four core content areas
2. Common language, structure, and process for curriculum delivery
3. Innovative Technology
4. Aligned written, taught, and tested curriculum
5. Clarified and specified TEKS/STAAR expectations assembled in a vertical alignment format
6. Customizable instructional plans that allow district resources to be integrated into the system

The TEKS Resource System (TRS) is a systematic K-12 curriculum model designed, maintained, and continuously developed by a collaborative of Education Service Center personnel and exemplary educators from Texas school districts. TRS provides a shared language, structure, and process for curriculum development via an easy-to-use online software delivery system. The curriculum model aligns the written, taught, and tested curriculum and is inclusive of research and best practices mentioned in the works of such notable researchers as Drucker, Deming, English, Wiggins, Erickson, Guskey, Marzano, Feurstein and Jacobs. All curriculum documents, resources and assessment items are aligned to the TEKS.

TEKS Resource System is a curriculum that clearly articulates the expectations of students that are identified from the Texas Essential Knowledge and Skills (TEKS). TEKS Resource System's blueprint for success is achieved through concepts and understandings, performances and products, and instructional delivery. Instructors are provided the tools to teach the TEKS in an effective manner.

If you would like more information on our curriculum, the TEKS Resource System Parent Portal is now available. On the parent portal select the grade level and subject area that you are interested in. You will see a box to check for "9 Weeks Version" - please check this box, since we operate on a nine weeks' schedule.

Who uses TEKS Resource System?
